

The senior management of Cedar Group ensure that a Business Continuity Management System is maintained to manage the risk of any disruption to all stakeholders, systems and infrastructure of the business and to fulfil all obligations.

Cedar Group now adopts an integrated resilience approach incorporating Threat Analysis, Disaster Recovery, and Business Continuity which falls under the overall Risk Management responsibility.

A risk assessment is maintained which covers both internal and external issues which may impact upon the business. The Senior management are responsible for ensuring that control of risk to business continuity is an integral part of the operational management.

The nominated BCM team will support the ongoing risk management, review incident response and carry out a regular testing regime.

A key objective is to build resilience into the systems and processes to minimise the risk of any disruption. The BCM system aims to anticipate, prepare for, prevent, respond and recover from any disruptions to the business.

The on-going suitability of BCM policy and provisions is reviewed at regular intervals or when there are pertinent changes or events. Objectives are set to focus continuous improvement in the provisions for effective business continuity.
